Class Descriptions on Back

All classes can be modified to any fitness level

Class Descriptions

Cardio Emphasis

Cycling – An overall cardio and fitness workout including strength training using stationary bicycles. This class offers varying levels of intensity for the different needs of participants. Beginners to advanced students are encouraged to attend and will benefit from this class.

Zumba – Fuses Latin rhythms and easy to follow aerobic dance moves to create a dynamic fitness class blending cardio and muscle-toning. All fitness levels are welcome and encouraged. Ditch the workout and join the party! Classes offer extra modification support, while pushing those who want to go to the max. A great way to burn off calories while having fun!

Strength Emphasis

Core & Flexibility – This class will help you dig deeper in your core fitness through gaining knowledge of and strength/endurance of your abdominal, back and hip muscles. While working out you'll delve deeper into how to attain better joint, muscle and fascia (connective tissue) mobility and flexibility with exercise and both dynamic and static stretching. Using Piyo and therapeutic techniques in this fast paced class, you will come out with the ability to move more fluidly, efficiently and comfortably with work, play and everything in between! This class is appropriate for all fitness levels, as modifications to exercises are taught and encouraged as needed.

Enhance Fitness – A specialty class to allow individuals to train for improvement in everyday activities, and for those dealing with chronic illness. Real life functional movement patterns such as twisting, bending, pushing, pulling, lunging and squatting are done in a safe, fun and creative way. Core training, balance and flexibility are all included to provide a well-rounded program. You will walk away feeling more confident to take on daily activities with more energy. This class is appropriate for all ages and fitness levels, and especially for those just starting an exercise program.

Full Body Workout – A workout comprised of a series of focused simultaneous upper and lower body exercises to build lean muscle strength and sculpt the body using light weights. Music and breath help keep the focus on movements that optimize muscle burning and provide an effective aerobic workout. Relaxation through breathing and stretching exercises completes the workout. A perfect way to end your day!

Pound – A Rockout Workout! Channel your inner rockstar with this full body cardio-jam session inspired by the infectious, energizing, and sweat-dripping fun of playing the drums. This class is appropriate for all ages and fitness levels!

Power Pump – A full body workout that incorporates exercises from both traditional and non-traditional strength training and matches movement to music to create a simple, fun, and effective way to weight train. This class focuses on multiple repetitions using light weights, dumb bells and bar bells to work major muscle groups. This class is interval based with cardio components intermixed. Routines cater to all fitness levels.

Total Body Blast /HIIT – This HIIT style 45 minute class offers a variety of strength and endurance exercises similar to a boot camp. Includes a full body warm-up, strength training using a variety of methods including body weight, free weights, bars, and steps, and finishes with core work and stretching. Total body incorporates bursts of cardio into movements intended to help you increase intensity and maximize your workout. Modifications available for all fitness levels.

TRX – TRX Suspension Training utilizes functional movements, used in everyday life, with major emphasis on stability, proprioception, strength and body weight-driven exercises. Suspension Training is all about core strength and precise execution of the exercise being performed, and every class offers a different instructing style and format so that boredom is never an option. Challenge yourself to something new!

Yoga/Tai Chi/Restorative

Tai Chi – A class that combines martial arts movements with circulation, breathing, and stretching techniques. Tai Chi has been tested and proven to be effective in decreasing the number of falls, the risk of falling, the fear of falling, and improving functional balance and physical performance. It's a targeted class that will teach the various forms of Tai Chi that lead to increased fitness and balance for the individual. This class is appropriate for all ages and all fitness levels, and especially for Seniors. Beginner's Tai Chi focuses on balance and overall health and is ideal for those with no Tai Chi experience, or for those wanting a refresher.

Yoga – Classes consist of traditional standing and seated postures that focus on strength, alignment, balance, and opening. Breath awareness and control are integral and therefore emphasized. Special emphasis on relaxation is included. All levels are welcome and encouraged.

Multi-Level Yoga – A one hour practice with a short meditation, pranayama-breathing, warm up of gentle stretching, a brief vinyasa flow, and poses for strength, balance and flexibility ending with a traditional savasana restorative pose. This class is especially good for those who like to personalize their practice or accommodate special needs. Comfortable for beginners to experienced. Props & mats available.

Restorative Yoga – A class focusing on yoga poses to reach deep breathing and relaxation, to help restore the body. Poses are held for longer than in conventional yoga. Props such as folded blankets and bolsters are incorporated, to relax the body, reduce stress, and allow focus on breathing.

Gentle Yoga – A gentle yoga practice for beginners through experienced practitioners. Emphasis on range of motion, stretching, balance and fluidity in a basic 'safe learning', personalized yoga format including: floor, seated and standing poses (chairs optional).

Roll, Release, Reset – A class focused on preparing you for your day, helping those with neck and back strain from seated work, and for those transitioning from medical physical constraints. Foam roller work for muscle and fascia release, specific stretching exercises to release tension and strain, and strengthening and postural work to prepare the body for activity, will be included.
